

Unit 6.5: Text Adventures

- **Debug\ Debugging:** Fixing code that has errors so that the code will run the way it was designed to.
- **Function:** In this context, a section of code that gets run when it is called from the main code. A function in a program is usually a piece of code that gets run lots of times.
- **Link:** A way of connecting one page to another.
- **QR Code:** a code consisting of black and white squares, typically used for storing URLs or other information for reading by the camera on a smartphone.
- **Repeat:** To make something happen again.
- **Sprite:** A computer graphic which may be moved on-screen.
- **Text Adventure:** A computer game that uses text instead of graphics.
- **Selection:** When selection is used, a program will choose a different outcome depending on a condition.
- **Variables:** A variable has a name and a value. The program can change this variable value.
